تحليل سوق العمل السوري التقني:

تنظيف البيانات ب استخدام SQL
كيف حولت الفوضى الى بيانات جاهزة للتحليل؟(عينة صغيرة من الاكواد)

فك تشابك المهارات المسطحة (Flat Data)

```sql
INSERT INTO job_skills (job_id, skill_id)
SELECT
    j.id,
    s.id
FROM raw_jobs r
JOIN jobs j ON j.title = r.job_title
JOIN LATERAL unnest(string_to_array(r.skills, ',')) AS sk(skill_text) ON TRUE
```

```sql
INSERT INTO job_skills (job_id, skill_id)
SELECT
    j.id,
    s.id
FROM raw_jobs r
JOIN jobs j ON j.title = r.job_title
JOIN LATERAL unnest(string_to_array(r.skills, ',')) AS sk(skill_text) ON TRUE
JOIN skills s ON s.skill_name = TRIM(sk.skill_text);
```

استخراج الرواتب من النصوص

```sql
WITH raw_numbered AS (
    SELECT
        salary,
        ROW_NUMBER() OVER () AS rn
    FROM raw_jobs
),
jobs_numbered AS (
    SELECT
        id,
        ROW_NUMBER() OVER () AS rn
    FROM jobs
)

UPDATE jobs j
SET
    salary_min = CASE
        WHEN r.salary LIKE '%-%'
        THEN SPLIT_PART(TRIM(r.salary), '-', 1)::INTEGER
        ELSE TRIM(r.salary)::INTEGER
    END,

    salary_max = CASE
        WHEN r.salary LIKE '%-%'
        THEN SPLIT_PART(TRIM(r.salary), '-', 2)::INTEGER
        ELSE TRIM(r.salary)::INTEGER
    END
FROM jobs_numbered jn
JOIN raw_numbered r
ON jn.rn = r.rn
WHERE j.id = jn.id
AND r.salary IS NOT NULL;
```

```sql
WITH raw_numbered AS (
    SELECT
        salary,
        ROW_NUMBER() OVER () AS rn
    FROM raw_jobs
),
jobs_numbered AS (
    SELECT
        id,
        ROW_NUMBER() OVER () AS rn
    FROM jobs
)

UPDATE jobs j
SET
    salary_min = CASE
        WHEN r.salary LIKE '%-%'
        THEN SPLIT_PART(TRIM(r.salary), '-', 1)::INTEGER
        ELSE TRIM(r.salary)::INTEGER
    END,

    salary_max = CASE
        WHEN r.salary LIKE '%-%'
        THEN SPLIT_PART(TRIM(r.salary), '-', 2)::INTEGER
        ELSE TRIM(r.salary)::INTEGER
    END
FROM jobs_numbered jn
JOIN raw_numbered r
ON jn.rn = r.rn
WHERE j.id = jn.id
AND r.salary IS NOT NULL;
```
